

Case Study

ChildLink needed to arrange a flexible, cost effective payment solution in less than a week, acceptcards rose to the challenge!

Acceptcards helped to set up a payment solution for Child-Link International on preferential charity terms, enabling them to benefit from very low card processing rates and an affordable terminal rental.

They had received several quotes elsewhere with hefty set-up fees and minimum monthly account charges, we waived all set-up fees and incorporated a zero minimum monthly processing charge onto their account, so they no longer need to worry about any unnecessary charges when they aren't processing.

From start to finish we had them up and running in just under a week and ready in time for their two week fund raising event

“ I've been extremely pleased with Accept Cards. I investigated the best options for our charity to use a mobile payment terminal and knew nothing about the options available; their staff were excellent in guiding me through to the best solution and ensuring we got the help we needed. They offered competitive rates, with us being a charity, and gave a friendly helpful service even when working to a tight deadline. I have no hesitation in recommending them to other potential customers. ”
